

Claims and evidence worksheet

Complete one set of the fields below for each principal claim. Use the references in your online entry.

Identify the product

Field	Your information
Product name and manufacturer	_____
Model, formulation and relevant software version	_____
Intended users and principal use	_____

Record each claim

Field	What to record
Claim reference	A unique label, such as C1
Exact claim	The wording used on the label, instructions or website
Location	Document page, label panel or stable URL
Supporting source	Evidence reference, file title, author and date
Relevant finding	Page or section, method, participants, conditions and result
Product match	The product studied and its relationship to the entered version
Applicability	Why the finding relates to the proposed users and use
Limits	Uncertainty, exclusions, contrary findings and gaps
Relationships	Funding, authorship and applicant involvement

Keep an evidence index

Reference	File or source	Relevant pages	Claim supported
E1	_____	_____	_____
E2	_____	_____	_____
E3	_____	_____	_____

Complete a claim record

Copy this record for each claim and enter the matching references in the application.

Field	Your record
Claim reference and wording	_____
Supporting file and pages	_____
Method, users and conditions	_____
Finding	_____
Match to the entered product	_____
Limitations and contrary findings	_____
Author and funding relationships	_____

Check the relationship

Finished-product, ingredient and component studies have different uses. Explain differences in dose, formulation, population, task and environment before relying on related material. Report what the evidence establishes and where it stops.

Transfer the information to your entry

Use these references in the claims section and upload the relevant files. Include unfavourable findings and meaningful limitations; a testimonial alone does not establish a health outcome. Read the [evidence requirements](#) for the complete preparation guidance.
