

Use-context worksheet

Use these fields to describe who uses the product, what they do and the conditions that matter.

People, task and setting

Field	What to include
Product and version	Model, formulation and relevant software release
Intended users	Relevant age range, abilities, experience, language and exclusions
Main task	What the user is trying to do and the intended result
Setting	Home, movement, recovery or another stated environment
Conditions	Connectivity, lighting, storage, hygiene or other material requirements
Assistance	Tasks completed by the user, caregiver or professional

Map the important steps

Step	Who performs it?	Instructions or assistance	Supporting evidence
Setup	_____	_____	_____
Main task	_____	_____	_____
Results	_____	_____	_____
Errors	_____	_____	_____
Maintenance	_____	_____	_____

Explain limits and ongoing effort

Note any training, consumables, subscription, physical effort or caregiver time. Identify users and environments outside the proposed use and when professional advice is needed. Explain how the evidence conditions compare with ordinary use.

Choose primary and secondary contexts

Select one [primary context](#). Add a secondary context only where additional tasks or conditions are supported. Identify the relevant evidence separately rather than assuming one setting covers another.

Prepare a public description

Combine the product, users, task and setting in a short factual description. Keep personal information and private study details out of it. The confirmed public details inform the use described in an award record.
